## SUMMARY

---

Enthusiastic team player with a solid foundation in full-stack development and data science. Proven ability to navigate complex technical challenges in varying environments. Delivers super solutions independently and as part of a dynamic team, always willing to push beyond the basics. My agility in learning new technologies, unwavering commitment to excellence, and academic background in software engineering position me as an ideal candidate for full-stack development and data science roles. Excited to apply my skills and contribute meaningfully to innovative projects in these fields.
